Friday Jan. 10  
9:00-10:00 am

Kindergarten  
registration begins  
January 13

The robust program at Elbow Park School provides children with opportunities to explore, create and connect ideas to their world. First hand experiences with a variety of materials and people help our students build a solid foundation for later abstract learning.

Students use multiple forms of representation as they learn, solve problems, create and reflect.

**“The Elbow Park kindergarten program provided our daughter with an extremely positive platform for academic, emotional and social development. The kindergarten teaching team is caring, kind and respectful. They create a warm and welcoming environment that makes each student feel special and honoured. I would highly recommend this program to anyone considering enrolling their child in kindergarten.”**

## Elbow Park School Kindergarten

Early childhood is a significant period in human development. Independence, initiative, decision-making, creativity, the ability to learn, the ability to relate to others and feelings of self-worth all have their beginnings in early childhood. What young children learn at this stage will have a major impact on successful learning experiences in school, on personal development and on future participation in society. (Alberta Education)

Elbow Park School is a warm, inviting and welcoming environment with a wide array of resources and supports available for all students. Our work includes a school-wide inquiry idea or question, which students explore through their curriculums. A wide variety of artists and experts engage with students in

authentic tasks so that work is deeply connected to the world in which they live. An integrated use of relevant technologies prepares students for their future. Students work with in multi-age groups on an on-going basis to develop self-understanding, strong relationships

**“This is our first experience with EPS as our daughter marched off to Kindergarten this past September. Not only does our daughter thrive in the classroom, which is designed to invoke creative and individually paced learning but she longs for a full day at the small-sized Kindergarten, something her parents are not yet ready for. For us as parents, we are most impressed by the sincerity and genuine concern of the Kindergarten's leadership, Mrs. K. Goodmanson, who ensures that the children's time in class is fun, challenging and rewarding. The vast range of the day-to-day social and educational activities ensures that our daughter will be in good stead as she continues on to complete further grades at EPS.”**
